inClass: The last school app you will ever need

The latest version of inClass, version 2.0.3 released on January 12th, 2011, has been in the Top 5 Productivity Apps on the App Store ever since it came out along with apps from other companies like Microsoft and Google.

The great success of inClass is reflected by the over 300,000 downloads and a 4.5 star rating (out of 5) given by our users. We are also proud to confirm that we are getting almost 10,000 new users everyday who review inClass with words like

"This is definitely "the" tool to use for students. It's the best organizer/ planner and the only one you'll ever need"

"Wow!!!! This blew me away. For free?!?! I simply cannot find a better app. I tried. Download it!!!!"

"I have tried several other highly rated apps, but this one is the best by far. Aesthetically pleasing, easy to use and navigate, and with all the necessary features."

inClass' growth is far from being done. We are working hard to improve it with every update, and make it the most powerful tool for our users, high school students, college students, and even professors. We are dedicated to continue supporting education this way and keep inClass free so that it reaches as many people as possible.

inClass development team

About inClass:

inClass is a student organizer/note taker application designed for high school and college students. It allows students to take notes, photos, and record audio and video to supplement their class annotations and share this annotations between each other; besides keeping track and alerting them of their class schedule, homework, exams, and instructors' information and office hours. Its first version was released on September 2010.

About OneZeroWare:

OneZeroWare, LLC, is a Daly City, California, based company founded in January 2010, dedicated to the development of mobile-based applications and accessories. In May 2010, co-founder Jose E. Malca. won the Apple WWDC Student Scholarship for his academic excellence and innovation in iPhone related projects. OneZeroWare also presented the CardioVest at the WWDC Education Event, a critical-care learning device that works in tandem with iOS devices to train nurses and doctors in the recognition of heart anomalies. Its flagship product, inClass, debuted in September 2010.
