Volcano Corporation is HIRING

SOFTWARE ENGINEERS!

Volcano Corporation develops, manufactures and commercializes a broad suite of devices designed to facilitate endovascular procedures, enhance the diagnosis of vascular and structural heart disease and guide optimal therapies. We are dedicated to developing breakthrough technologies that save people's lives or enhance their current quality of life! Without the exceptional professionals at **Volcano Corporation**, we simply could not fulfill our mission to improve the lives of patients worldwide.

We are successful because of the talent and energy of outstanding employees. We believe in hard work, but we also strongly believe in a life/work balance.

At **Volcano** you will find a pioneering and innovative spirit with a wide range of opportunities. We are currently hiring in our **San Diego, California** location. Candidates must be willing to locate.
We are looking for:

- *Software Engineers*
- *Senior Software Engineers*
- *Principal Software Engineers*

All positions require at least 2 years of experience and a BS or MS degree in Computer Science, Computer Engineering, Electrical Engineering, Biomedical Engineering (or equivalent area of study). Experience in the medical device industry, design controls, FDA and ISO regulations, and signal/image processing is a preferred.

Volcano Corporation offers a competitive and comprehensive salary and benefits package.
