

CENTER FOR CHEMICAL EVOLUTION

research • innovation • education • outreach

CCE Undergraduate Summer Research Program

RESEARCH ACTIVITIES

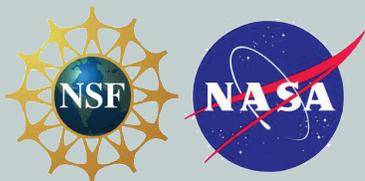

- Develop a research question around the study of chemical evolution and the chemistry associated with the origins of life.
- Conduct exciting hands-on scientific research.
- Present your research results as a paper, presentation, poster, and/or publication.

Who Should Apply?

- Undergraduates with an interest in chemistry
- Students from underrepresented minority groups and women are strongly encouraged to apply
- US Citizenship or permanent residency is required

Benefits & Details

- Receive mentoring from a number of top faculty within the CCE and network with peers and graduate students
- Get prepared for graduate school
- Students will be placed in one of several CCE labs across the country, depending on preferences and availability
- Students will receive a minimum stipend of \$3500 and housing for 10 weeks of participation
- Summer program participation dates depend on advisor choice
